The Power of Truth

## INTRODUCING THE *NEW* i-PRO S-SERIES

Panasonic i-PRO Sensing Solutions announces the new i-PRO S-series network cameras. With AI processing found in our premium products now available in our mid-range camera line, the new i-PRO S-series comes with a built-in AI processor that transforms your camera into an edge-computing device to improve your surveillance operations.

The new i-PRO S-series cameras can install third-party applications without a cloud- or server-based connection. They also provide stronger H.265 coding and image processing optimization to adapt to changing scene environments, producing clearer images even in low-light conditions.

Additionally, these new cameras offer sound classification\* allowing you to set alarms for targeted sounds, and they are compatible with i-PRO's multi-AI system, a search function that quickly finds people or vehicles through the video management software, Video Insight and Genetec.

Currently available in indoor: dome, vandal dome and box, the new i-PRO S-series comes with AI software analytics, a five-year warranty and Video Insight camera license.

The new i-PRO S-series...setting the standard in surveillance cameras.

### KEY FEATURES:

- Built-in AI Processor for Edge-Computing Technology
- Select and Install 3<sup>rd</sup>-Party Applications Independently
- H.265 Coding Efficiency
- Image Processing Optimization
- NEW Sound Classification
- NEW Multi-AI System Search Function
- Bundled with AI Software Analytics, a Five-Year Warranty and VI Camera License
- Easy Kitting Packaging
